

## **Remarks**

Applicant's attorney, Gregory W. O'Connor, cordially thanks Examiner Singh for his gracious telephone discussion of the subject Office Action.

It was agreed in that telephone interview that claims 1-14, 15-25, and 27 recite a common "special technical feature" which, based on the current record in the subject patent application, defines a contribution which each of the elected process and apparatus claims, considered as a whole, makes over the prior art.

Claims 29 and 39, also directed to the elected invention, have been placed in independent form to facilitate examination.

## **Conclusion**

Applicant believes no fees or petitions are due with this filing. However, should any such fees or petitions be required, please consider this a request therefore and authorization to charge Deposit Account No. 50-3199 as necessary.

If the Examiner should require any additional information or believes that prosecution of the application may be expedited via a telephone conference, the Examiner is invited to contact the undersigned attorney.

Respectfully submitted,

Dated: May 5, 2011
